

Questionnaire: Sexually Transmitted Diseases

Title of Project: Prevalence of *Chlamydia trachomatis* infection in foreign exchange students in Portugal

Researchers of the Instituto de Higiene e Medicina Tropical (IHMT), Universidade Nova de Lisboa are performing a prevalence study of a sexually transmitted disease caused by *Chlamydia trachomatis*, in a specific group (foreign students).

This study is being performed by a PhD researcher Andreia Gravata and participation is in a voluntary base and anonymous.

Sexual transmitted infections are acquired from person to person through intimate sexual contact and one of the most common causes of infection around the world. According to ECDC (European Centers of Disease Control and Prevention), adolescents and young people experience high rates of STI, which can endanger their long-term health.

The aim of this study is to understand how some social and demographic factors may be associated with the acquisition of sexual transmitted diseases, especially *C. trachomatis*.

Participants will need to answer a free online questionnaire on demographic information and sexual behaviour. The data collected from the questionnaire is confidential. If you do not want to be recognized, please do not give any information that can lead to you. Result data will be used for a PhD thesis and for publications in scientific journals.

If you have any other question, feel free to contact us.

Researcher: Andreia Gravata

IHMT: 213652600/ Rua da Junqueira nº 96, 1349-008 Lisboa, Portugal Thank you for being a part of this study.

Date

Age

Gender

- Male
- Female

Ethnicity

- Caucasian
- African
- Oriental
- Latin American
- Other

Nationality

Portuguese institution you currently attend

How long have you been in Portugal (months)?

In what kind of residence are you living in Portugal?

- Private residence - alone
- Private residence – with family
- Shared residence – shared with other foreign students
- Shared residence – shared with portuguese students
- University residence
- Other

Nota: Questão disponível apenas no questionário *online*.

Which course are you attending right now?

Nota: Questão disponível apenas no questionário *online*.

Menarche age (only for girls)

Age at first sexual intercourse

Sexual partner(s) gender(s)

- Male
- Female
- Both

Total number of sexual partners in your lifetime

Number of sexual partners in the last 6 months

Total number of portuguese sexual partners

Have you ever practiced oral sex?

- Yes
- No
